THE
CYBER
ESCAPE
ROOM
CO.

GAME ON.
## THE ULTIMATE CYBER ESCAPE ROOM HYPE PACK.

CYBERESCAPEROOM.CO

MEME FOR YOUR TEAM.

Ask the team to share their best cyber security memes before the escape room. The best (or most accurate) one gets a 30 second head start in the game for their team.

Here are some of our favourites that we stole off the internet.

"MEET" THE HACKER.

Introduce a mysterious hacker character leading up to the event (could be via emails or intranet posts). This character could send cryptic messages, challenge participants with mini-puzzles, or taunt teams with clues about the escape room. Think of it as a "cyber villain" they need to outwit!

Example puzzles:

- Encrypt a message in morse code and ask them to decode it.
- Create a fake Twitter profile (or use ours below) for the hacker and leak information on it - ask people to OSINT them to find out the answer to a question about the escape room or about cyber security in general.
- A mini quiz about cyber security, famous cyber criminals, or hacker movies.

Which two cities does this aeroplane fly between?

EMMA FAYE... MFA... GET IT?!

HACK IS THE NEW BLACK.

Encourage your team to don their best hacker attire for the day and really make yourselves feel bad... cause you know that's what they think you probably wear on a weekend, right?!

See whether you get more Mr Robot, V for Vendetta, or Matrix vibes. We're gonna guess there'll be plenty of hoodies...

AND IF ALL ELSE FAILS, THERE'S ALWAYS...

GOOD LUCK!
