30 MINUTES

THE SCENARIO.

As a member of the elite hacker group “Atomic Kitten,” you’re always on the lookout for criminal opportunities. Today is your lucky day!

A woman on your train has alighted, leaving her rucksack behind. Never one to pass up a chance to make some money, you decide to dig around and see what you can do with this potential goldmine. With 45 minutes until she reaches her destination and realises her bag is missing, can you break into her bank account and transfer some of her hard-earned cash?

Good luck—the gang is counting on you.

LEARNING OUTCOMES.

- Social Media Privacy: Identify issues with privacy settings using real-life social media accounts featured in the scenario.
- OSINT-Enabled Passwords: Understand why using personal information like relatives’ names or birthdays as password components is poor cyber security hygiene.
- Lost Devices: Translate the game’s focus on a lost device into real-world risks related to device security.
- Password Hygiene: Recognise instances of poor password practices, such as storing passwords in a file on the desktop.

WHAT’S IN THE BOX.

Ok, Brad Pitt... chill out, we’ll tell you.
